Create a Tab Gallery

Step 1) Add HTML:

Example

```
<!-- The grid: four columns -->
<div class="row">
  <div class="column">
    
  </div>
  <div class="column">
    
  </div>
  <div class="column">
    
  </div>
  <div class="column">
```

```

        
    </div>
</div>

<!-- The expanding image container -->
<div class="container">
    <!-- Close the image -->
    <span onclick="this.parentElement.style.display='none'"
class="closebtn">&times;</span>

    <!-- Expanded image -->
    <img id="expandedImg" style="width:100%">

    <!-- Image text -->
    <div id="imgtext"></div>
</div>

```

Use images to expand the specific image. The image that is clicked on inside the column, is shown in a container below the columns.

Step 2) Add CSS:

Create four columns and style the images:

Example

```

/* The grid: Four equal columns that floats next to each other */
.column {
    float: left;
    width: 25%;
    padding: 10px;
}

/* Style the images inside the grid */
.column img {
    opacity: 0.8;
    cursor: pointer;
}

.column img:hover {
    opacity: 1;
}

```

```
}

/* Clear floats after the columns */
.row:after {
    content: "";
    display: table;
    clear: both;
}

/* The expanding image container (positioning is needed to position the
close button and the text) */
.container {
    position: relative;
    display: none;
}

/* Expanding image text */
#imgtext {
    position: absolute;
    bottom: 15px;
    left: 15px;
    color: white;
    font-size: 20px;
}

/* Closable button inside the image */
.closebtn {
    position: absolute;
    top: 10px;
    right: 15px;
    color: white;
    font-size: 35px;
    cursor: pointer;
}
```

Step 3) Add JavaScript:

Example

```
function myFunction(imgs) {  
  // Get the expanded image  
  var expandImg = document.getElementById("expandedImg");  
  // Get the image text  
  var imgText = document.getElementById("imgtext");  
  // Use the same src in the expanded image as the image being clicked  
  on from the grid  
  expandImg.src = imgs.src;  
  // Use the value of the alt attribute of the clickable image as text  
  inside the expanded image  
  imgText.innerHTML = imgs.alt;  
  // Show the container element (hidden with CSS)  
  expandImg.parentElement.style.display = "block";  
}
```
